Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

and/or the dishes during a subprogram step using washing liquor to be heated, the heat energy used for the desorption of the sorption column is largely sufficient.

The domestic dishwashing machine and the sorption column in document D1 are of the same size and capacity as the dishwashing machine and the sorption column in the present application. Consequently, the heat energy of the sorption column known from document D1 is likewise "largely sufficient for heating the washing liquor in the washing compartment and/or the dishes in a subprogram step using washing liquor to be heated".

2. Dependent claims 2, 4, 5, 6 and 9 contain no features which, combined with the features of any claim to which they refer, meet the PCT requirements for novelty and inventive step (see documents D1 and D2 and the corresponding passages cited in the search report).

3. The combination of features contained in dependent claim 3 is not known from or suggested by the available prior art.
